

Giving Shape to Ideas

An Integrated Document Workflow Solution for State and Federal Agencies.

government

 **Dispatcher**
Phoenix **Government**

Solutions.

At a time of shrinking budgets, rising costs and increasing expectations, government agencies are naturally looking for new ways to increase productivity, streamline processes and serve the public with greater speed, accuracy and efficiency. Konica Minolta's Dispatcher Phoenix Government provides government employees with the tools they need to handle their documents – quickly, efficiently and securely.

With Dispatcher Phoenix Government, state and federal employees can have instant access to the information they need while complying with security regulations. And manual document processes can be automated, reducing the risk of human error while optimizing operational efficiency.

Fast, Efficient Document Distribution.

Dispatcher Phoenix Government automatically collects, processes and distributes government documents such as records, applications, cross-agency communications and other filings to multiple outputs – all in a single step. Document files can be sent to network/local folders, email recipients, printers, and popular document management systems such as Microsoft SharePoint. With its visually appealing folder browsing feature at the MFP, Dispatcher Phoenix Government gives you a familiar, Windows Explorer-like view of your directory structure to help you select the correct folder as your scan destination.

Integration with Secure Infrastructure.

Through Konica Minolta MFPs, Dispatcher Phoenix Government integrates with the federal government's smart card platform to provide a seamless, secure solution that addresses federal security concerns and mandates. With support for both authentication via CAC and PIV cards and Active Directory, Dispatcher Phoenix Government meets the Two-Factor Homeland Security Presidential Directive known as HSPD-12.

Protecting Documents.

Along with CAC/PIV authentication, other security features include:

- Copy Defender process to prevent unauthorized copying of sensitive documents.
- Intelligent redaction, which permanently removes personal information from documents.
- File conversion to password-protected PDFs.
- Fully integrated support for Microsoft Windows local and domain policies for security audit and tracking.

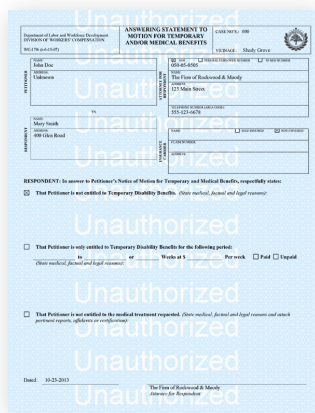

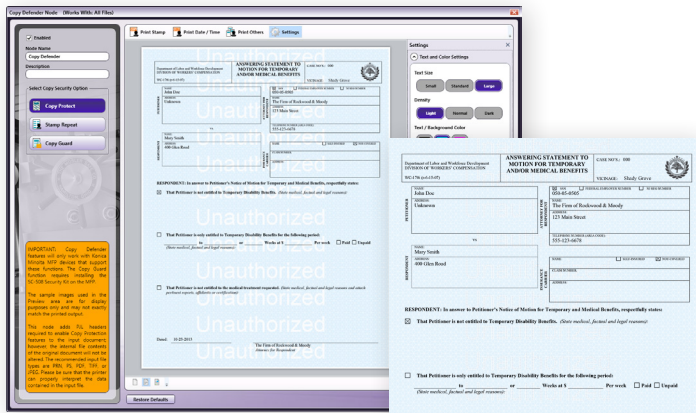

Streamlining Government Workflows.

To help state and federal agencies as well as public sector organizations optimize workflow efficiency, Dispatcher Phoenix Government includes automated processes that get the job done quickly and accurately. You can make information instantly retrievable by converting paper-based files into PDF Searchable. Read and route invoices based on barcode. Edit scanned images by converting files to Microsoft Office formats, such as Word or Excel. Rename files at the MFP. Other advanced automated processes include zonal OCR for data extraction, metadata routing, ODBC connectivity for integration with common databases – and much more.

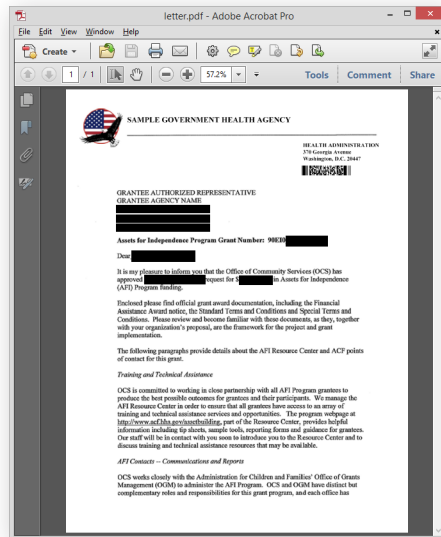

SharePoint Connectivity.

Dispatcher Phoenix Government includes a connector to Microsoft SharePoint for document storage, accessibility and collaboration. Files can be automatically distributed to SharePoint or directed to SharePoint at the MFP during time of scanning. Just scan, index, and send each document to the appropriate SharePoint folder – all with a few quick taps on your MFP control panel.

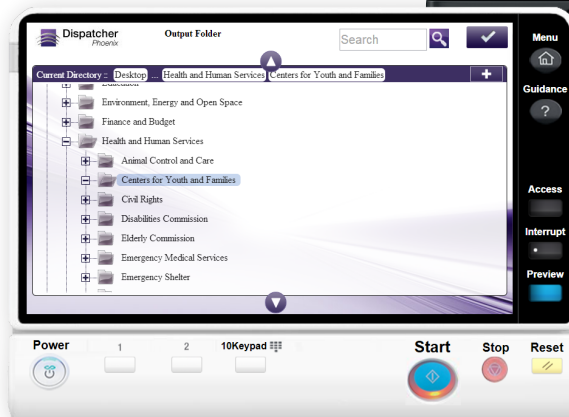

Protect Your Documents.
 Dispatcher Phoenix Government comes with a Copy Defender process that prevents the unauthorized copying of sensitive documents. Add Copy Protection features to documents automatically, such as pantograph backgrounds, stamps that mark copies as “Unauthorized,” “Illegal Copy,” etc., and more.

Automatic Redaction.
 With Dispatcher Phoenix Government’s intelligent redaction, confidential information can be automatically and permanently removed from your document. And redaction search terms can be modified or added at the MFP panel for the utmost flexibility.

Direct Integration at the MFP.
 Dispatcher Phoenix Government provides a fully integrated experience at the MFP using a unique, visually appealing display. And folder browsing at the MFP is simple and intuitive with Dispatcher Phoenix Government’s Windows Explorer like view of your directory structure. Select what folder you’d like to browse to, view files within folders and sub-folders, and even create a new folder – all directly at the MFP.

Customized. Dispatcher Phoenix is a family of automated document workflow solutions from Konica Minolta. For government, professional and general business applications, Dispatcher Phoenix can optimize business processes, reduce costs and increase productivity – providing advanced automation features that minimize time-consuming manual document handling and processing tasks.

Dispatcher Phoenix is available in several versions to best suit different needs. All versions of Dispatcher Phoenix include a graphical Workflow Builder tool, an intuitive Workflow Scheduler, full MFP integration with a visually enhanced display, document indexing and folder browsing capabilities at the MFP, robust authentication options, and add-in options that allow you to enhance the speed and efficiency of your document workflow. Add-in options include:

- Forms processing to automatically extract and process unique identifiers from forms (social security numbers, birth dates, etc.) using pattern matching so you don't have to know the specific content.
- Connectors to cloud storage providers – Box, Dropbox, WebDAV, Microsoft OneDrive, FilesAnywhere, and FileAssist (Konica Minolta's new cloud document management solution), etc.
- Advanced Bates stamping to automatically apply counters, metadata, static text, and more – anywhere on the page.
- Advanced job routing features to send your print job to the most suitable or cost-effective printer.
- Connectors to other content management systems, including OnBase® by Hyland and Worldox® by World Software, and Wordshare.
- Release2Me, a convenient print release solution that helps our customers secure their confidential information and eliminate unwanted or duplicate copies.
